

AMENDMENT

Serial No. 09/397,675

B1
Cont'd

a weight portion that is connected to the transducer, and supported at a position different from the center of gravity of the transducer and the weight portion itself; and

a detecting section which detects the amount of characteristic corresponding to a torsion of the transducer caused by an angular moment centered on the supporting position of the weight portion upon application of acceleration in one direction to the transducer and the weight portion, wherein a face of the transducer is made flush with a face of the weight portion.
